

**AIHA RESULTS FRAMEWORK:
HEALTH CARE KNOWLEDGE RESOURCES (LEARNING RESOURCE CENTERS)**

OVERALL GOAL: To promote improved health care practices through increased access to, use of, and understanding of available knowledge resources.			
OBJECTIVES	OUTCOME INDICATORS	METHODOLOGY (TIMEFRAME)	OUTPUT INDICATORS
Objective 1: Increased access to up-to-date health care knowledge resources.	<p>1.1. % of targeted health professionals using (computer-based) knowledge resources</p> <p>1.2. % increase in literature-based health information needs met through computer-based knowledge resources</p>	<p>1.1. Staff Surveys (annual)</p> <p>1.2. Staff Surveys (annual)</p>	<p>% of health professionals trained to use computers and the Internet (monthly)</p> <p># of health professionals trained to use computers and the Internet (monthly)</p> <p># of information requests from health professionals/patients (monthly)</p> <p># of health professionals with access to the LRC (annual)</p> <p># of LRC visitors (monthly)</p>
Objective 2: Increased promotion of evidence-based practice.	<p>2.1. % of LRCs producing practice standard reviews using evidence-based methodologies</p> <p>2.2. % of partner institutions that have developed systems for evaluating and developing practice standards</p>	<p>2.1. LRC monthly reports and practice standard reviews</p> <p>2.2. EBP Survey (annual)</p>	<p># of active information coordinators trained in evidence-based practice/critical information quality assessment (workshops, on-site training)</p> <p># of practice standard reviews conducted at partner institutions</p> <p>% of staff using Ovid/MEDLINE and Cochrane Library (staff survey)</p>
Objective 3: Demonstrated ability to sustain access to knowledge resources independent of AIHA funding.	<p>3.1. % of active LRCs no longer receiving funding from AIHA for Internet connectivity</p> <p>3.2. % of LRCs that have received grants from external sources to support access to knowledge resources</p> <p>3.3. % of LRCs that are generating revenues and/or recovering costs from outside sources</p>	<p>3.1. LRC budget monitoring</p> <p>3.2. LRC monthly reports, LRC strategic plans</p> <p>3.3. LRC monthly reports, LRC strategic plans</p>	<p>% of LRCs applying for grants (monthly)</p> <p># of information coordinators trained in grant proposal-writing and sustainability strategies (workshops)</p>

10/08/2002

<p>Objective 4: Increased development and use of information and communication technology tools and applications.</p>	<p>4.1. % of partner institutions that have developed and are using databases to manage administrative and/or health care information</p> <p>4.2. % of partner institutions that have developed local area networks that enable expanded access to knowledge resources</p> <p>4.3. % of partner institutions that have developed an institutional Web site</p> <p>4.4. % of partner institutions using LRC for telemedicine, including remote e-mail-based teleconsultations</p>	<p>4.1. LRC monthly reports, LRC strategic plans</p> <p>4.2. LRC monthly reports, LRC strategic plans</p> <p>4.3. LRC monthly reports</p> <p>4.4. LRC monthly reports, LRC strategic plans</p>	<p># of information coordinators trained in database design (workshops)</p> <p># of information coordinators trained in Web page design (workshops)</p>
